DECLARATION OF INDEPENDENCE

When in the course of the human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We the Representatives of the United States of America, in General Congress assembled, do hereby declare that these United States are, and of right ought to be, free and independent States; that they are absolved from all allegiance to the British Crown, and that all political connection with them is hereby and forever dissolved.

That the Declaration of Independence of the United States of America, in General Congress assembled, do hereby declare that these United States are, and of right ought to be, free and independent States; that they are absolved from all allegiance to the British Crown, and that all political connection with them is hereby and forever dissolved.

That the Declaration of Independence of the United States of America, in General Congress assembled, do hereby declare that these United States are, and of right ought to be, free and independent States; that they are absolved from all allegiance to the British Crown, and that all political connection with them is hereby and forever dissolved.

That the Declaration of Independence of the United States of America, in General Congress assembled, do hereby declare that these United States are, and of right ought to be, free and independent States; that they are absolved from all allegiance to the British Crown, and that all political connection with them is hereby and forever dissolved.

Figure 1. The effect of the concentration of the polymer on the gelation time of the polymer solution. The concentration of the polymer was 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, 0.7, 0.8, 0.9, and 1.0 g/dL. The temperature was 40 °C. The concentration of the initiator was 0.01 g/dL. The concentration of the catalyst was 0.01 g/dL. The concentration of the monomer was 0.1 g/dL. The concentration of the solvent was 0.1 g/dL. The concentration of the water was 0.1 g/dL. The concentration of the other components was 0.1 g/dL.
